

VI.3.6B-SETUP-PROD SETUP: P - PRODUCTS

This response displays a list of identifiers for products as follows:

Product Identifiers				
1) FFDOUN	2) FFDTUL	3) FFGAR	4) FFGCO	5) FFGKS
6) FFGMO	7) FFGNM	8) FFGOK	9) FFGTX	10) FFGOUN
Select (a-add c-change d-delete l-list m-more p-previous):				
Enter id:				

Response a-add or c-change

For a-add or c-change the following prompt appears for the input source:

Enter Parameters (f-file [t]-terminal m-menu):

Response f-file input

The response f prompts for a complete directory and filename of an ASCII file containing the desired parameters. The input data required in a file depends on the parameter type. The input data is described in DEFINE-PROD.

Response t - terminal input

Response t for Products prompts for a product identifier:

Enter product id:

After an identifier from the list is entered, the edit screen is displayed.

Edit Product Parameters - id	
(1)	Product ID (MAX 9 CHAR):
(2)	Circuits (MAX 3 CHAR):
(3)	WMO ID (6 CHAR):
(4)	Sending office (4 CHAR):
(5)	Time zone (1 CHAR):
(6)	Message format (SHEF or GRIB): SHEF
(7)	Default type (AFFG,GRID,HFFG): AFFG
(8)	Longest duration (6, 12, or 24 hrs): 6
(9)	Description (0 - no, 1 - include): 1
(10)	Stream name (0 - no, 1 - include): 0
(11)	Number of Identifiers in product: 3
FFGOUNHD TEXT TNCO37 AFFG OKCO31 AFFG	
Select (number or <return>-exit):	

When (6) Message format is set to GRIB, alternate parameters are used as follows:

```
( 9) Pack GRIB bulletin ([0]-No 1-Yes):    0
(10) West column:      415
(11) Number of columns: 14
(12) South row:        305
(13) Number of rows:   20
```

Selecting a number prompts for entering information for the selected parameter. Return exits to the list of identifiers.

After selection a-add, c-change or d-delete, prompts appear for an identifier number and identifier:

```
Enter (number):
Enter identifier:
```

Selection 'a' moves current identifiers and inserts a new product identifier at the designated number. Selection 'c' replaces the current identifier at number with the new identifier. Selection 'd' removes the desired identifier at number by compressing the identifiers.

Response d-delete

Response d-delete displays the following prompt:

```
Delete number:
Identifier:
Are you sure (y or n):
```

By responding with the desired identifier number from the identifier list and the corresponding identifier, parameters for the identifier will be deleted and the index compressed. A response of 'n' will abort the deletion process and return to the identifier list.

Response l-list

Response l-list displays the following prompt to write parameters to an ASCII file:

```
Directory and name of output file (<return>-exit)
Enter:
```

After entering the complete directory and filename, prompts appear for a range of identifier numbers from the identifier list:

```
List from ( 1):
to (nnn):
```

where nnn is the maximum number of identifiers

Parameters for the beginning identifier number through the ending identifier number are written to the specified file. The file can be

edited and read as an input file when response a-add or c-change is selected followed by response f-file.

Response m-more

Response 'm' for the prompt displays the next screen of identifiers when more identifiers exist beyond the current display.

Response p-previous

Response 'p' for the prompt displays the previous screen of identifiers when more than 100 identifiers exists and the first identifier displayed is not identifier labeled 1).
